

# InfuSystem Infusion Catheter Care Kits

A cost savings for your practice.

InfuSystem offers infusion catheter care kits as part of our ambulatory pump program. Our infusion catheter care kits contain all the initiation and disconnect supplies required for weekly catheter maintenance, including dressings for the catheter site and flush solutions.

**How it Works** InfuSystem can provide the infusion catheter care kits to your practice at no cost. We then bill the patient's insurance directly just as we do with our ambulatory pumps and supplies, reducing your administrative burden.
