

InfuSystem provides ambulatory infusion pumps and related clinical support to over 40,000 patients annually, nationwide. We provide accurate, electronic, ambulatory infusion pumps with the appropriate supplies and 24/7 expert clinical support, including our round-the-clock pain management clinical team.

InfuBLOCK by InfuSystem delivers so much more than just a block. Take your Continuous Peripheral Nerve Block program to a new level of convenience and cost savings. InfuSystem can significantly reduce cost concerns for your facility's program and give greater peace of mind to your practice.

## INFUBLOCK ADVANTAGES:

### Significant Cost Savings!

With our insurance billing option, we can significantly reduce your current pump cost concerns. InfuBLOCK can bill your patient's insurance, rather than your practice, for use of the pump and supplies, while also providing patient monitoring when the patient arrives home.

No patient insurance? No problem! InfuBLOCK's facility-billed service delivers **BIG SAVINGS** from the high cost of disposable pumps for your patients without insurance, and comes with all of our additional services.

- Billed to Insurance
- Billed to Facility
- Capitative Model

### High Patient Satisfaction:

InfuBLOCK's patient satisfaction scores are proven to be high. Patients on our service are averaging a patient satisfaction score of 9.3 out of 10.

### Patient Follow-up:

InfuBLOCK's trained follow-up staff contacts patients daily and logs pain and satisfaction scores. Those scores are available to you, securely, online, anytime. We do all the work, and even deliver automated e-mail alerts to you for when a patient pain score exceeds a threshold that you set.

- Monitors Patient Daily
- Log Patient Feedback
- Proactive Patient Outreach
- Ensures Effective Pain Management

### BlockPain Dashboard Data:

Simply log into the InfuSystem's BlockPain Dashboard from anywhere to securely review your patient pain scores, status, and progress.

- Patient Satisfaction Scores
- Pain Scores
- Patient Notes
- Hotline Calls
- Custom Text and Email Alerts

### 24/7 Support:

InfuBLOCK's trained support staff is on-call 24/7 to assist with pump questions.

- Patient Support (Pain & Pump)
- Staff Support
- Filters Calls for Anesthesiologists

### Accurate Infusion Device:
