

Stay Ahead of the Flu Curve With Infusion Pump Rentals and Sales

Prepare now for the 2025-2026 respiratory season.

Last year's **flu and respiratory virus season** resulted in one of the highest hospitalization rates since the pandemic began. **The CDC expects a similar surge in combined hospitalizations from influenza, COVID-19 and RSV — potentially within 20% of last year's peak.**

As hospitals and infusion centers continue to face strain, now is the time to ensure your facility is equipped.

InfuSystem helps you stay ahead of the flu curve with flexible IV infusion pump rental, lease and purchase options — all with fast delivery and trusted, patient-ready equipment.

Our **infusion pump rental and sales programs** help facilities manage higher patient volumes without costly capital expenditures or long-term contracts.

Why Plan Now

- The 2024-2025 flu season was classified by the CDC as high severity across all ages — the first in over six years.
- Early preparation ensures infusion pumps are available when patient demand spikes.

Don't wait until your census climbs — prepare now with InfuSystem to manage inventory and control costs.
