

## Negative Pressure Wound Therapy (NPWT) Helps Wounds Heal Faster

InfuSystem's NPWT Program Is Your Source for Next-Level Effective Wound Healing Across the Care Continuum.

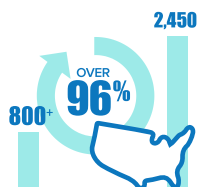

### Focused Patient Care

Our dedicated Patient Care Team provides compassionate and reliable support for wound therapy patients during their transition home. Patients can depend on us throughout their wound care treatment to help review insurance benefits, monitor patient progress and help with additional supply orders.

### Simple and Cost-Saving Approach to Billing

InfuSystem provides three simple billing methods to manage your NPWT needs and ensure you meet billing guidelines.

- **Direct Billing to Patients' Insurance** – For your patients who are being discharged but still require therapy.
- **Inpatient Wound Vac Pump Rentals** – Direct billing to the hospital or clinic for daily and monthly rental programs to help manage inventory and costs.
- **Smart Lease** – Maximize your cost savings and ensure a steady supply of our NPWT wound vac pumps.

Nationwide, InfuSystem is a participating in-network provider in **over 800 health insurance networks** covering **over 96% of the U.S.**, with **over 2,450 facility customers**.

### Trusted NPWT Devices

Delivering simple, reliable and effective wound healing across the continuum of care.

- ✓ FDA approved for use in hospitals, long-term care facilities and home-care settings
- ✓ Lightweight and portable, with up to 24 hours of battery life (can extend to 48 hours with sleep mode)
- ✓ User-friendly interactive interface with easy-to-read LCD screen

## Nisus® NPWT System Features

The Cork Medical Products Nisus Negative Pressure Wound Therapy System is indicated for use in patients who would benefit from negative pressure wound therapy, particularly as the device may promote wound healing by the removal of excess exudates, infectious material and tissue debris.

### Recommended for Patients With:

- Chronic, acute, traumatic, sub-acute and dehisced wounds
- Partial-thickness burns
- Pressure ulcers, diabetic ulcers and venous ulcers
- Flaps and grafts

**Step-By-Step Troubleshooting Guide** for alarms such as Canister Full, Vacuum Leak and Blockage

### IV Pole Accessible

### Powerful Flow Rate of ~10 L/min

### Convenient Rear Compartment Battery Access and Replacement

### Multiple Unique Features for Clinical Enhancement of Negative Pressure Wound Therapy Such As:

- Patient Runtime
- Sleep Feature
- Alarm Log
- Lock Restriction
- Variable Intermittent and Continuous Therapy Modes

## Calculate Your Smart Lease Savings

InfuSystem's Smart Lease program provides the advantage of leasing NPWT devices to steadily meet demand and control costs, all while providing reliable and effective wound healing.

Calculate Your Savings Now By Visiting Our Lease-to-Own Calculator.
