

Negative Pressure Wound Therapy *Trusted Wound Care.*

From the hospital to the home, our Negative Pressure Wound Therapy (NPWT) program makes it simple to ensure the continuity of care your patients need and deserve.

Focused Patient Care

Our dedicated Patient Care Team provides the best support possible for wound therapy patients during their transition home. We're here to support patients with reviewing insurance benefits, progress monitoring and additional supply orders.

Simple and Cost Saving Approach to Billing

InfuSystem provides three simple approaches to managing your NPWT needs.

- **Direct Billing to Patient Insurance** – For your patients that are being discharged but still require therapy.
- **Inpatient Rental** – Direct billing to the hospital. Daily and monthly programs available.
- **Smart Lease** – Maximize your cost savings and ensure a steady NPWT device supply.

Nationwide, InfuSystem is a participating in-network provider in over 770 health insurance networks covering over 95% of the U.S., with over 2,400 facility customers.

Trusted NPWT Devices

Delivering simple, reliable and effective wound healing across the continuum of care.

- Simple design for easy therapy initiation and troubleshooting for optimal patient care
- High performance with a powerful, yet quiet, motor
- Portable size discreetly fits into a patient's lifestyle
- Proven technology with over 1,000,000 days of therapy*

Calculate Your Smart Lease Savings

InfuSystem's Smart Lease program provides the advantage of leasing NPWT devices to steadily meet demand and control costs, all while providing reliable and effective wound healing.

Calculate Your Savings Now by Visiting Our Lease-to-Own Calculator.

Cardinal Health™ NPWT CATALYST™

Delivering simple, reliable and effective wound healing across the continuum of care.

- Simple design for easy therapy initiation and troubleshooting for optimal patient care.
- Full canister and blockage alert emits an audible and visual alert to ensure patient is receiving constant therapy.
- Twist N' Connect™ canister port connection supports easy and secure attachment.
- High performance with a powerful, yet quiet, motor.
- Portable size discreetly fits into a patient's lifestyle.
- Can be used with simultaneous wound irrigation
- Dual-lumen tubing technology maintains and monitors pressure at the wound site. Tubing is designed to remove exudate while providing continuous NPWT and detecting blockages.

Cardinal Health™ SVED®

Easy to navigate controls and light-weight design, the SVED® device is our simple NPWT solution to help you confidently deliver the results your patients deserve.

- Intuitive design is easy to use
- Easy to navigate with single button controls
- Small, quiet, light-weight device
- Long battery life (up to 18 hours)
- Visual and audible alerts
- Continuous and intermittent therapy modes
- Foam dressing kits and accessories are compatible with multiple Cardinal Health™ NPWT devices for easy connection and transition across the continuum of care.
- Can be used with simultaneous wound irrigation
