InfuBLOCK™, the Complete CPNB Solution for Post-Op Pain Control.

InfuBLOCK is a full-service program for the delivery of Continuous Peripheral Nerve Blocks (CPNB) reducing the reliance on opioid pain medication for post-surgical recovery. InfuBLOCK enables healthcare providers to administer fewer opioids while significantly reducing costs and improving patient satisfaction scores.

**InfuBLOCK Provides**

- Accurate Infusion Devices
  - Certified for Accuracy (+/- 6%)
  - Bolus Feature Available
  - Audible Safety Alarms
  - Reporting Capability

- **Cost Reduction**
  Per patient cost is typically 30-50% less than elastomeric pumps. In addition, InfuBLOCK offers electronic pumps which allows for billing as a DME provider on most insurance plans.

- **Dedicated Clinical Support for Post-Operative Patient Care**
  Our Clinical Support Team provides continuity of care for post-operative patients during their transition home. We’re here to support patients with pump-related education and questions, nerve block expectations and progress monitoring.

- **Post-Operative Patient Follow-Up**
  Our Patient Care Coordinators contact patients to gather pain and satisfaction scores.
  - Patient follow-up calls – daily until last day of therapy
  - Scores are accessible securely online 24/7 with the InfuBLOCK Dashboard™
